Art Unit: 1623

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 22, 2010 has been entered.

Claims 1, 9, 14-17, 20-23, 25, 26, 31-33, 37, 43, 44, 46-48 and 50 are rejected under 35 U.S.C. 112, first paragraph, because the specification, while being enabling for BODIPY conjugated to guanidinoaminoglycoside, does not reasonably provide enablement for any therapeutic agent conjugated to guanidinoaminoglycoside. The specification does not enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention commensurate in scope with these claims.

A conclusion of lack of scope of enablement means that, based on the evidence regarding each of the factors below, the specification, at the time the application was filed, would not have taught one skilled in the art how to make and/or use the full scope of the claimed invention without undue experimentation.

(A) The breadth of the claims.

The claims encompasses conjugation of any therapeutically agent to guanidinoaminoglycoside.

(B) The amount of direction provided by the inventor.

The working examples limited to the conjugation of a single therapeutic agent to guanidinoaminoglycoside, is clearly not commensurate with the full scope of the claimed invention.

Page 3

(C) The existence of working examples.

The examples are limited to conjugation of BODIPY to guinidinoaminoglycoside.

(D) The level of predictability n the art.

A person having ordinary skill in the art at the time the invention was made, would not have been able to predict which specific therapeutic agent will exhibit an enhanced cellular uptake when conjugated to guanidinoaminoglycoside because molecules of different structural formula and sizes would not have been expected to produce similar results. For example, a conjugated protein and a conjugated metal would not have been expected to produce predictable results.

(E) The quantity of experimentation needed to make or use the invention based on the content of the disclosure.

Because it cannot be predicted a priori which specific therapeutic agent will exhibit an enhanced cellular uptake when conjugated to guanidinoaminoglycosides, it would take an enormous amount of trial and error to test cellular uptake of therapeutically active agents having various structural formulas and including small molecules and large molecules.

Claims 10, 11, 13, 27, 28 and 30 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Application/Control Number: 10/571,510 Page 4

Art Unit: 1623

Applicant's arguments filed July 22, 2010 have been considered but are moot in view of the new ground(s) of rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elli Peselev whose telephone number is (571) 272-0659. The examiner can normally be reached on 8.00-4.30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia Jiang can be reached on (571) 272-0627. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
